PROFILE

[GitHub](#) | [LinkedIn](#)

Highly skilled and motivated Back-End Web Developer with over 1 years of experience in developing responsive and user-friendly websites. Proficient in Django and Django Rest Framework. Proven ability to collaborate effectively with cross-functional teams to design and develop innovative solutions that meet business requirements. Strong problem-solving skills. Delivering high-quality, scalable web applications.

PROJECT EXPERIENCE

Automating the differentiation ofgraduate studies in universities

- This app automating the differentiation of graduate students in universities is a web application whose backend is developed using Django and Django Rest Framewok. The application allows users to create accounts, enter the required information and documents, and then specify the desires they want. After completing the specified period for submitting the differentiation request, the students are sorted according to their desires, and then the names of the students accepted for each desire are announced
