EDUCATION

Al-Baath University
Software Engineering

Homs, Syria
Sep 2019 – Present

PROJECT EXPERIENCE

Automating The Differentiation Of Graduate Studies In Universities

- This app automating the differentiation of graduate studies in universities is a web application Whose backend is developed using Django Rest Framework. The application allows users to create accounts, enter the required information and documents, and then specify the desires they want. After completing the specified period for submitting the differentiation request, the students are sorted according to their desires, and then the names of the students accepted for each desire are announced.
- Code on GitHub: ([link](#)).

News App

- This News app is a web application whose backend is developed using Django Rest Framework. The application allows users to create accounts and read all the news related to a specific section for example health, politics, sports, education.....
 - Code on GitHub: ([link](#)).
-
